

2010  
Blended  
Courses

## WHAT IS A BLENDED COURSE?

A “blended” course combines the best features of both instructor-led and web-based instruction. These features include:

- Live discussions with the instructor through the use of conference calls,
- Convenient, flexible web-based learning,
- A specific time schedule in which to complete the course, and
- Interaction with other students through the use of class problems posted on a discussion board.

### ***2010 Blended Course Schedule***

Introduction to Telecommunications Technology	February – March 2010
Advanced Telecommunications Technology	April – May 2010
Improving Highway Safety with ITS	June – July 2010
